Trouble Shooting

Roof Rattling: Metal Roofs can cause rattle where they are in contact with metal on the UTV. DiamondBack has provided foam tape to prevent this issue. If roof continues to rattle, please follow the following steps.

1. Check to ensure that all nuts and brackets are not loose.
2. Identify any places where the roof may be contacting metal on the UTV. Use the provided foam tape to place a barrier between these portions. If additional foam tape or pipe brackets are needed, they can be readily obtained at any hardware store or home center.
